

## Announcing Fleet Freedom Version 4.6

Good day Fleet Freedom clients. We hope you are off to a great start with this 2017 summer season. Last month we delivered a bunch of new features and User Interface polish. Based on your feedback, these features are being enjoyed by our user community.

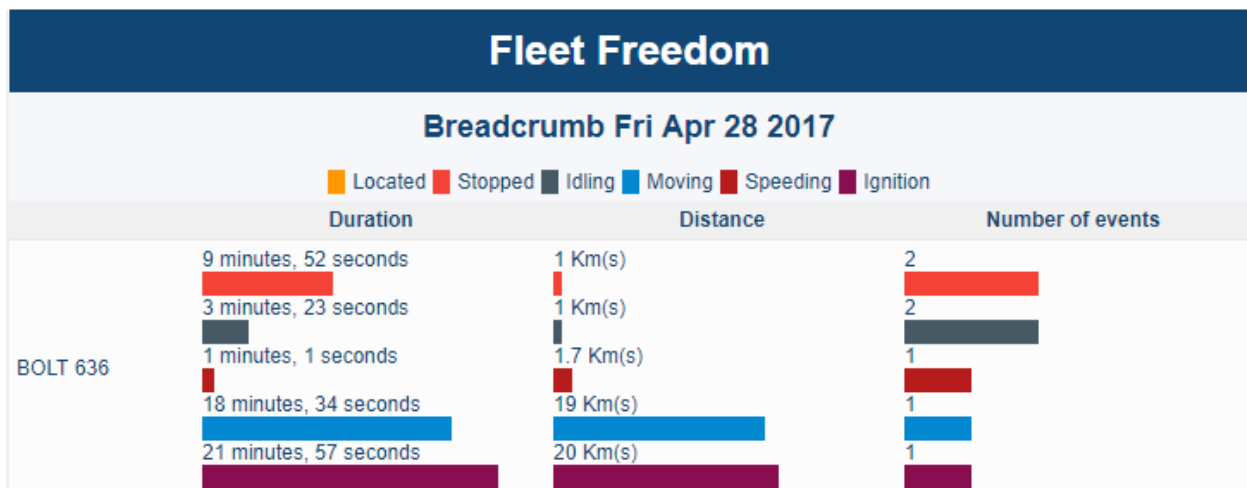

This month's release contains some promised features that we teased last month, along with some unexpected new features and enhancements.

Version 4.6 will be released next Thursday July 6th, around 9:30am. It is always important to clear your internet browser history and cache after an update, to ensure there is no old cached data or cookies that may cause issues.

## New Features and improvements

**Reports** - We love reports in Version 4, however it is our goal to continually improve them by adding new features and provide better summary data. This month's report work focuses on functionality and re-working the excel file. These are very significant new features that we've been working on for quite some time.

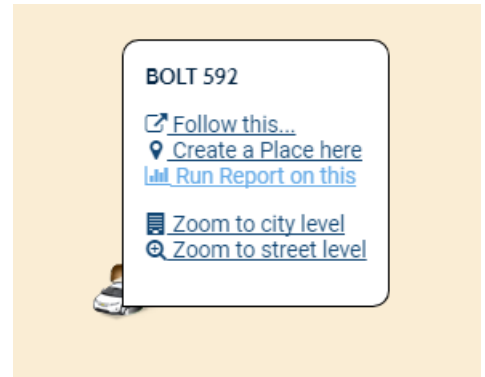

- Excel files now have a horizontal layout, making it much easier to summarize and post process the data. We've also added Summary data to the details already provided. Full Breakdown information is no longer included by default in order to reduce the size of the file
- We've attached a sample of the new Excel layout
- Emailed report results. You can now email the report results directly to users and assets. 2 Simple check boxes now appear below Schedules when building or modifying a report

- Users - enables emailing report results to users. Users of Fleet Freedom will now get an excel file emailed to their inbox in the new format. Results for assets that the user has access to will be included
- Assets – emailed results will now be available to individual assets in Fleet Freedom. An email address needs to be stored with the person's contact information, or add the

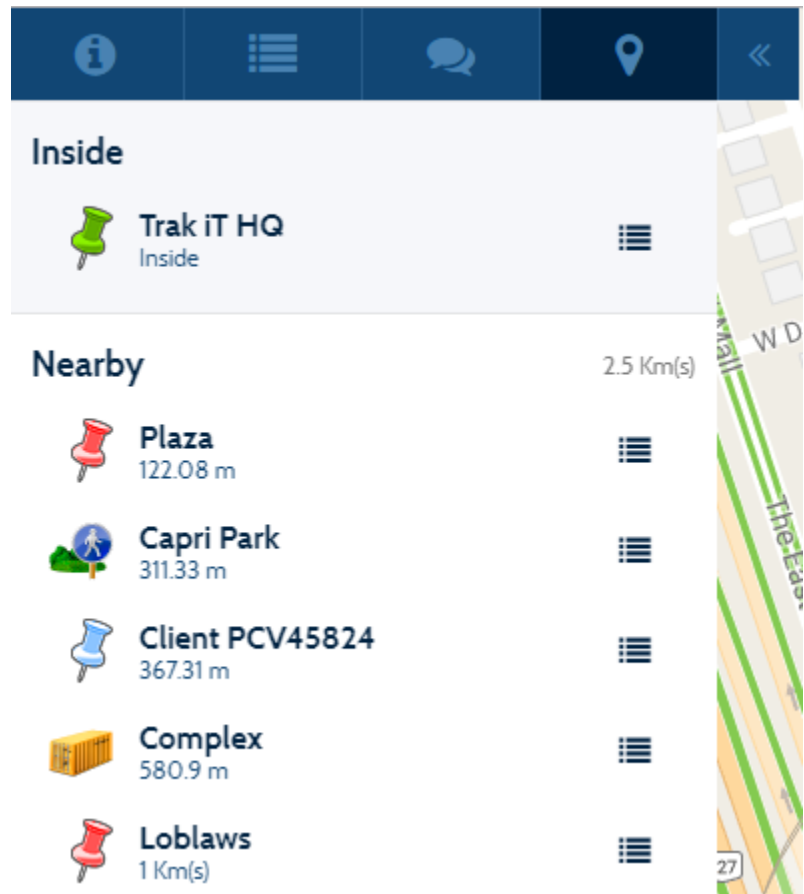

driver's email address to the vehicle profile under SMS/Email under Asset/Information/Advanced. Once this is done, and Assets are selected on report templates, individuals will receive their own report results as a bar graph in the email with their personal results. This is very similar to how the data is presented today in reports under the Details tab

- Right click on Asset to run report. This is a quick handy way to get direct report results for a single Asset on the map. Simply right click on any asset and choose "Run report on this."
- We'll automatically choose a breadcrumb trail report for the current day. If no Breadcrumb report is used by your Company, it'll chose the first report in the list.

**Places Closest to an Asset** – A great feature request from one of our clients. Fleet Freedom already has a great dispatch tool which displays all assets inside a place, and all assets closest to a place, based on your map zoom level. One of our clients suggested we build the reverse feature, which shows all places close to an asset. We can think of a ton of use cases for this, but this will be commonly used in the service and sales industries as we can help you efficiently go to the next closest place with a quick lookup.

- Simply click on the new locate icon beside your Vehicle or Person asset
- Dispatch Customers get an extra feature. Automatically create a new task at the selected place. See the list icon beside the place and click on it. It will then create a new task for that Asset

**Linger Place Notification** – A long anticipated feature. A very simple, but powerful tool.

- Set a timer in behaviors and receive notifications when an asset stays too long at a Place
- Keep an eye out for a few new features as well related to this in some future monthly releases

**Let us know what you think! Your feedback is invaluable** - As always we appreciate your ongoing feedback of Fleet Freedom. Please continue to communicate with our Support and Sales teams to provide additional feedback on how we can better serve your geolocation needs.

For any questions, comments or concerns, please email [support@fleetfreedom.com](mailto:support@fleetfreedom.com) or speak to one of our customer service reps at: 1 (866) 787-2548, Ext 2. Our call center is open from 8:30AM-5PM EST, Monday to Friday.

Thank you very much for your continued business and loyalty to Fleet Freedom. It is our honor to provide you with solutions that you rely on day to day to help manage your business.

Sincerely,

The Fleet Freedom Team
